## **DETAILED ACTION**

### ***Response to Amendment***

Amendments to the claim have been entered.

### ***Allowable Subject Matter***

1. Claims 1-2, 4-6, 8-11 are allowed.

The primary reason for allowance of claims 1-2, 4 and 9 is the inclusion of having a toner image being transferred onto an intermediate transfer body after a toner image of a previous image being entirely formed on the intermediate transfer body where the toner images are formed successively, which is found in all of claims 1-2, 4 and 9 but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claim 5 is the inclusion of a toner image forming position on an intermediate transfer body that is moved on a downstream side in a moving direction of the intermediate transfer body at each of the image forming station where toner images are formed successively, which is found in all of claim 5 but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claims 6, 8, and 10 is the inclusion of having a toner image being transferred onto an intermediate transfer body after a toner image of a previous image being entirely formed on the intermediate transfer body where the toner images are formed

Art Unit: 2852

successively, which is found in all of claims 6, 8, 10 but not disclosed nor suggested by the prior art of record.

The primary reason for allowance of claim 11 is the inclusion of a toner image forming position on an intermediate transfer body that is moved on an upstream side in a moving direction of the intermediate transfer body so that a distance between a first toner image and a second toner image is larger than the length  $L_{ab}$  at each image formation where the toner images are formed successively, which is found in all of claim 11, but not disclosed nor suggested by the prior art of record.
